EMBARGO UNTIL:

Frontline Aerospace, Inc. Press Conference

Association of Unmanned Vehicle Systems International

Tuesday, June 10, 2008 – 9 am – Room 25C

FRONTLINE AEROSPACE TO UNVEIL BREAKTHROUGH UAV

Broomfield, CO – Frontline Aerospace, Inc., will unveil its breakthrough UAV design for the V-STAR™ unmanned aerial vehicle at a press conference scheduled for June 10 at 9 am in Room 25C during the San Diego conference of the Association of Unmanned Vehicle Systems International (AUVSI).

V-STAR™ — VTOL-Swift Tactical Aerial Resource™ — presents a unique solution to the longstanding UAV design challenges posed by the Front Line Delivery System (FLDS) and related Multi-Role Endurance (MRE) missions.

Core V-STAR™ technology enables superior speed, rate of climb, reliability, endurance, payload and mission flexibility. V-STAR™ is ideal for modern maneuver warfare, plus non-military applications, and provides operators with a single platform that:

- Combines VTOL and fixed-wing operations
- Reaches targets 2-3 times faster than helicopters
- Delivers the first genuine solution to the FLDS and related MRE missions
- Provides exceptional payload flexibility in the field (logistical, lethal, ISTAR, and EW)
- Offers exceptional fuel-efficiency, platform survivability, safety and low signature

Frontline Aerospace, Inc., is an emerging company based near Denver, CO focusing the talents of proven aerospace and business experts.
